Lubricating Fluid

Lubricating Fluid is a medium viscosity metal cutting liquid for use in reaming, tapping, drilling and other metal cutting operations.

Features

Sutton Tools Lubricating Fluid has been specifically formulated to -

- Dissipate heat from both the tool work piece
- Act as a lubricant between the tool and the work piece
- Extend tool and die life by reducing wear
- Improves thread and surface finish
- Remove swarf from the cutting edge
- Flows to cutting edge
- Excellent penetration into deep holes and slots

For use with holesaws, drills, taps, reamers and general metal machining applications.

Apply Lubricating Fluid to work piece prior and during machining process.
