Panel Drill #30 Tupoint

Panel drills have been developed to drill holes for rivets in flat and curved panels and used in sheet metal fabrication. These drills are only recommended for shallow holes no deeper than 1.25 x diameter. When using twin-point drills always ensure that the chuck jaws are fully tightened.

Features

- Made from M2 high speed steel
- #30 size to suit 1/8" rivets
- 135° modified point design
- Fully tested and approved by Sutton R&D department
