Drill Bits Multi-Purpose

The Heat treated body high grade carbide top and high melt braze 1100°C give this drill the ability to drill very hard materials.

These multi-purpose bits can be used in timber, concrete, bricks, stone, CSR™ Hebel®, Stainless Steel, Cast Iron, Steel & Glass.

Features

- **Ground carbide tip for rotary use only.** Hammer and percussion action will damage the ground tip profile resulting in poor drilling performance. Drilling masonry materials prior to wood or steel will dull tip reducing the cutting performance.
- The L-profile flute design efficiently extracts concrete, metal and wood particles.
- Ideal for drilling in multi laminated construction, such as through a steel bracket into masonry.
- Plug colour.

Helpful Hints

- For best results use a pedestal drill where possible.
- The carbide tip is hard and brittle be careful not to drop drill.
- Drill should be used dry or under a flood of coolant. Intermittent cooling will cause the tip to crack and fail.
