Gamflex Bi-Metal Holesaws

Metal Cutting (depth of cut 32mm)

Made from Bi-metal/high speed steel, these holesaws are blue and have exceptional strength and high wear resistance. They cut a variety of materials including steels, cast iron, non ferrous materials, plastic and wood. Ideal for trade use.

Single Tooth Holecutters

Wood Cutting (depth of cut 51mm)

Beige in colour and are specifically designed for cutting wood and cement sheet. Wood Holecutters are tungsten carbide tipped and cut 5 times faster in wood than conventional high speed steel bi-metal holesaws. These holecutters use the Gamflex arbor system, which make it ideal for trade use.

High Speed Steel Holecutters

Sheet Metal Cutting (depth of cut 2mm)

produce accurate, round clean holes in steel and alloy sheets. Holecutters are suitable for electrical installation work.

Diamond Grit Holesaws

Tile/Fibro Cement Cutting (depth of cut 32mm)

rapidly cut holes in fibreglass, hard plastics, fibro cement and ceramic tiles (including monocottura tile).

Tungsten Carbide Tipped Holecutters

Stainless Steel Cutting (depth of cut 2mm)

Cuts to a depth of 4mm in steels, fibreglass, chipboard, glass reinforced plastics and other abrasive materials.
