

Top quality tools that have set the standard...

All our tools have been designed by wood-turners, then manufactured in Australia from high quality M2 high-speed steel and painstakingly machined into a full range of gouges, chisels, parting and scraping tools.

The handles are turned from selected Australian hardwood and specially shaped to fit naturally in your hand. The ferrules are machined from heavy walled brass tubing.

All P+N[®] tools are given a special heat treatment process to maximise their performance in wood-turning applications. The result is a well-balanced, durable tool that you will be happy to use. You can buy any of the P+N[®] wood-turning tools individually.

Invest in the best and make your wood-turning a pleasure with tools manufactured in Australia by P+N[®].
